Trace	Outputs

Hello! 🙋 I'm here to help you find the perfect health insurance plan with HealthSecure Insurance.

Thanks for sharing your details — I see you're 25 years old, looking for family coverage with 4 dependents, and you mentioned special needs related to heart health.

 ◆ The **Family Health Plus Plan** would work well for your family — it covers in-patient and out-patient care, doctor visits, and emergency transport for all family members, ensuring your loved ones are well protected.

 ◆ Given your mention of heart-related needs, you might also consider the **Comprehensive Health & Wellness Plan**. This plan adds coverage for specialized treatments, wellness services, and broader prescription support, which can be especially valuable for managing heart health.

 ✚ Since you have specific heart health concerns, you can add the **Critical Illness Add-On**, which provides extra financial protection and access to top cardiologists and specialized care centers.

Suggestions for Improvement:

Use single-question-per-screen layout

 – Avoid long forms; show one field at a time with "Next" navigation.

Auto-expand input fields

– Make text inputs responsive so users can see what they type fully on small screens.

Add tappable suggestion buttons

 – Provide quick options instead of requiring full text input (e.g., "View plans", "Talk to advisor").
